

BHARATH T

AI & ML Engineer | Computer Science Engineering Student

bharath26.t@gmail.com | +91-9145217700 | <https://github.com/bharath26t-create> | [linkedin.com/in/bharath-t](https://www.linkedin.com/in/bharath-t)

PROFESSIONAL SUMMARY

Third-year Computer Science Engineering student at VIT-AP University specializing in Artificial Intelligence and Machine Learning. Experienced in building AI-powered applications, reinforcement learning systems, and full-stack solutions using Python, Java, and JavaScript. Proficient with cloud platforms (AWS) and ML frameworks (scikit-learn, LangChain). Seeking a software engineering or AI/ML internship to apply academic knowledge to real-world products.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C/C++, HTML/CSS, R

ML / AI: Scikit-Learn, LangChain, OpenAI API, NumPy, Pandas, Matplotlib, Streamlit

Databases: MySQL, MongoDB, Relational Databases

Tools & Platforms: Git/GitHub, AWS, Google Colab, VS Code, RPA

Concepts: Machine Learning, Deep Learning, Reinforcement Learning, Minimax / Alpha-Beta Pruning, Semantic Search, Agentic AI

PROJECTS

DevMind – AI Codebase Assistant | [Personal Project](#) 2024 – 2025

- Cloned any Git repository and built a semantic search index over its source code, enabling natural-language Q&A about the codebase.
- Designed a multi-agent debate system using four specialised AI agents to generate higher-quality answers.
- Stack: Python, LangChain, Semantic Embeddings, Vector Databases.

Chess AI – Minimax with Neural Evaluation | [Personal Project](#) 2024

- Built a Chess desktop application in Python using Pygame GUI with Minimax + Alpha-Beta Pruning search.
- Trained a neural network evaluation function on Stockfish-evaluated positions using python-chess and scikit-learn, improving move quality significantly over hand-crafted heuristics.

AI Assistant with ReAct Agents | [Personal Project](#) 2024

- Developed a conversational AI assistant using LangChain, ChatOpenAI, and ReAct agents capable of multi-step reasoning and tool use.
- Implemented streaming responses for low-latency interaction; integrated math calculation and web search tools.

Maze Solver – Q-Learning | [Personal Project](#) 2023

- Implemented a Q-learning agent that learns optimal paths in a maze environment using reward-based reinforcement learning.
- Visualised training progress and convergence of Q-values over episodes.

LEADERSHIP & ACTIVITIES

Co-Lead – Toastmasters Cultural Club | [VIT-AP University](#) 2023 – Present

- Directed club visual identity: designed posters, event flyers, and digital creatives, contributing to a 25% increase in event attendance.

- Led event decoration and stage design; collaborated with executive team to align creative output with club themes.

Technical Team Member – SEDs VIT-AP | [VIT-AP University](#) 2023 – Present

- Analysed real-world datasets and built end-to-end ML pipelines in a cross-functional team setting.
- Applied Python, pandas, scikit-learn, and visualisation libraries to uncover trends and deliver data-driven insights.

EDUCATION

B.Tech – Computer Science (AI & ML) | [VIT-AP University](#) 2023 – 2027 • Andhra Pradesh, India
CGPA: 8.01 / 10

Class 12 – CBSE | [Delhi Public School, Nashik](#) 2022 – 2023
Percentage: 75.6%

Class 10 – CBSE | [Delhi Public School, Nashik](#) 2019 – 2020
Percentage: 83.6%

CERTIFICATIONS

- Web 3.0 Certification (June 2024)
- AWS Academy Cloud Foundations
- AWS Academy Cloud Architecting
- MERN Full Stack Certification — Ethnus
- IGNITEB 3.5 — Wadhwani Foundation

LANGUAGES

English: Professional Working Proficiency

Hindi: Native / Bilingual

Telugu: Bilingual

Tamil: Native

Marathi: Bilingual

French: Elementary
